

## MCS 2000 - emergency power supply

- microcontroller based battery management for the supply of MCS-gas warning systems
- 24 V 2 ... 10 Ah harmonised to the gas warning system
- assured maintenance of the power supply during a power failure
- battery charger with I/U charging characteristics
- temperature adapter of the charging voltage by an external sensor module (option)
- LED display mains and battery operation, load, battery controlling
- 3 potential-free outputs for mains and battery operation, load, battery controlling
- data interface RS 232
- plastic case or switch cabinets
